i3-Technologies Now Available in Latin America

Leading collaboration solutions from i3-Technologies are now available in Latin America for education, corporate and government customers.

DIEST, Belgium — 27 March, 2017 — i3-Technologies, a division of i3 Group and a leading manufacturer of interactive products for education, corporate and government, announces the appointment of Edupan International LLC, as its first authorized distributor in the Latin American & Caribbean region. Edupan is a value-added provider of educational solutions who combines innovative technologies with pedagogical services to create engaging learning environments that enhance teaching and learning.

Edupan has built an exemplary reputation as a trusted, technology advisor and supplier and quickly noticed the tremendous benefits that customers could experience from adopting products from i3-Technologies.

“We are excited to represent i3-technologies in the region and to bring i3’s outstanding products to customers throughout the Latin American & Caribbean region,” said Ernesto León, managing director of Edupan. He continued, “The innovative solutions from i3 will offer tremendous value to both channel partners and end-users. In addition, the broad portfolio of interactive products means customers can more easily equip their classrooms and meeting rooms with the most appropriate collaboration solution that best meets their specific budget.”

Gert Van Erum, CEO of i3-Technologies said, “We are delighted to welcome Edupan as our authorized distributor to the Latin American market. The Edupan team definitely shares our passion for empowering customers to transform classrooms and meeting rooms alike.” Lisandro Nunez, global marketing & business development director at i3-Technologies, added, “Edupan’s excellent market knowledge, professionalism and customer service are critical in successfully bringing the i3-Technologies portfolio to the market. Customers—situated in nearly 30 countries from Mexico to Ecuador—can now purchase our products with confidence from this trusted provider.”

About Edupan International LLC.

Edupan International is based in the state of Florida, US and serves as value added distributor for the Latin America Region. With a highly specialized team, EDUPAN and its partners have implemented in the past years the largest educational technology projects in the Central America and the Caribbean region, deploying thousands of interactives classrooms and training a similar amount of educators in 21st Century Teaching Skills.

In the corporate sector, EDUPAN has impacted on the way teams collaborate, locally and remotely, by including state of the art technology in hundreds of meeting rooms and command centers.
